

# UPSS SHAFT BY URA, JAPAN-MADE

## [ UPSS SHAFT ]

### URA'S NEWEST SCIENTIFIC TECHNOLOGY IN UPSS SHAFT!

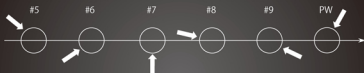

#### UPSS (Utilize Performance of Shaft System) 特許申請中

- \*UPSS Shaft is the only shaft and system, which spine, torque, kick-point, and CPM are all adjusted to the best line when we assemble the shaft and club head.
- \*Since the spine of shaft is adjusted according to your swing-arc, the kick of the shaft is also on your arc. So, it reduces your miss-hit and maximizes the ball distance!

① On ordinary shafts, the Spine is not adjusted precisely and it brings you unstable golf-shots.

\*ORDINARY SHAFT

➡ SHOWS DIRECTIONS OF HOW ORDINARY SHAFTS ARE BENT.

② UPSS Shaft is adjusted to be bent on your swing-arc. So, every club in your bag moves in the same direction.

③ Using UPSS Shaft and its system, we can also custom-fit your club to reduce your draw or fade.
